

A unique & innovative filter solution for all Digital users

Pocket-sized and compact digital cameras don't usually have a filter thread, so how can filters be attached to them ? COKIN, the inventor of the CREATIVE FILTER SYSTEM and leading filter manufacturer, have come up with an ingenious solution : the COKIN MAGNETIC SYSTEM.

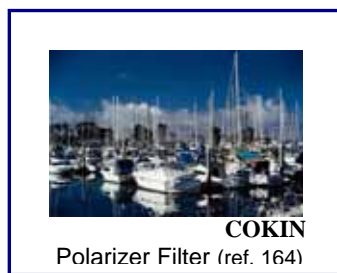

Then COKIN has the easy solution for you !!!!

Hundreds of effects to create or improve your images alike professionals

Following the ever-growing success of Digital technology, COKIN launched a magnetic version of the very famous Series "A" FILTER-HOLDER : the unbelievable MAGNETIC FILTER SYSTEM solves all yours attachment problems, allowing you to create special effects "*as in the movies*" on basically all cameras.

... & the way to live your own dreams using Digital Cameras or Camcorders !!

This innovative "MAGNETIC HOLDER" sticks easily by "magnetism" via a self-adhesive metallic ring to those lenses without thread and which couldn't accept filters up to now. The Filter-Holder is then firmly attached onto the ring and you can enjoy now the full use of the famous COKIN Creative Filter System on your compact-type digital camera or camcorder.

Handling

1 Peel off the protective film from the adhesive side of the metallic ring.

2 Affix the ring around the lens of your camera.

Cameras with metallic body do not need this ring: affix then directly your Holder around the lens.

3 Affix your Magnetic Holder onto the metallic ring.

4 Slide the filter into one of the Filter-Holder slots.

➡ To remove your Holder : **detach it firmly.**

So easy !! Stick it onto your Digital camera ... and travel into your world of fantasy!

As a starter KIT, COKIN offers a Filter-Holder in Blister, as well as a Portrait Kit and a Landscape Kit including both 2 top selling filters for the "COKIN beginners" :

B400-MM

G600-MM

G610-MM

* **A Filter-Holder in blister**

Magnetic Filter-Holder only

* **A Portrait Kit**

Magnetic Filter-Holder + 2 filters

+

Diffuser 1 filter (ref.830)

+

Center-Spot WA filter (ref.071)

* **A Landscape Kit:**

Magnetic Filter-Holder + 2 filters

+

Sunset 2 filter (ref.198)

+

Gradual Grey filter (ref.121M)

Compatibility

With this new Magnetic Holder, the **COKIN SYSTEM** will now be compatible with almost all types of digital cameras or camcorders in the market.

Security

Full tests have shown that the New **MAGNETIC SYSTEM** can be used safely into a Digital camera or camcorder without magnetic or electronic interferences, neither for your camera nor for your memory card.

Why use COKIN filters on Digital?

- 1.No computer needed to produce "special effects" or "image improvements".
- 2.No waste of time using intricate image-manipulation software.
- 3.Immediate results on the LCD screen.
- 4.High versatility as you may re-position the filter indefinitely, until you reach the best-desired effect.
- 5.Unlimited creativity with the complete range of over the 120 different "A Series" COKIN filters.

And : no matter how good your camera and how complete your Photoshop skills, there are some effects that can only be produced using a filter over the lens. The gradual neutral-density filter is a good example, and a very useful filter for the digital photographer. It allows you to take a landscape shot with the ground well exposed, while avoiding burning out the highlights in the sky.
